An industry first in compact safety vacuum cleaners

The new AERO SAFETY takes compact vacuum cleaners to another level, so you can enjoy premium performance, enhanced usability, and improved safety. From independent workshops to light industry – a versatile vacuuming solution is a must to ensure your safety on the job. That's why we've upped our game with the latest members of the AERO family. We've kept the compact versatility you love and added more premium features to make your working life easier and safer.
First off, the new AERO SAFETY H range has a high-quality H-Class filter which handles all sizes and types of hazardous dust – wet and dry. These machines are fitted with a unique LongLifeFilter with an extremely durable PTFE membrane. This filter is easier to clean and maintains performance for longer, so you get more reliable, safer dust extraction in your workshop. The rest of the AERO family has M-Class filters that also live up to global safety standards.
Furthermore, throughout the series, a state-of-the-art system that measures airflow lets you know if you need to clean the filter. Truly unique is the AERO SAFETY's AutoSense feature*, which automatically detects when you start using your power tool thanks to a Bluetooth remote control mounted on the vacuum hose. Optimized from the bottom up to be more manoeuvrable, easier to use and most of all safe, this is a compact vacuum cleaner that has the intelligence to work with you.
*Available on Aero 26 - W2H PC

De getoonde afbeelding kan afwijken van het gekozen type

- The industry's first compact safety vacuum cleaner that helps you work safely and can be moved around your workshop with ease
- Upgraded with the latest technology including state-of-art air velocity measurement system and a double sealed filter enabling high performance of your vacuum cleaner
- Smart operation via Bluetooth remote control enables easier ON/OFF functionality, auto detection of power tools, alarm notification, and more convenient operation
- Protects from electric shock with fully antistatic hose system
- Reduced noise level ¬– the latest AERO SAFETY series makes significantly less noise than previous models to ensure your comfort and safety while working
